DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-4,6-17,19,23-34 and 36 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. We see claimed methods and systems (actually, computer-readable media with code) for modeling the performance of a system comprising computing software operating on computing hardware. We do not see a claimed useful, concrete and tangible result. Please see the latest "Guidelines for Subject Matter Eligibility" published in the O.G. 11/22/2005.

Allowable Subject Matter

3. Claims 5, 18, 20-22, 35, 37 and 38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. These dependent claims refer to "displaying the curve modeling the first system parameter and the curve modeling the second system parameter on a single graph" or "issuing an alarm..." which are useful, concrete and tangible results.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Most notable is Fig. 4 of DeLuca et al.('270) which is a graph

correlating a computer's workload to an actual utilization; i.e. it shows how equation (6) of DeLuca et al. converts straight line 402 to a nonlinear curve 404.
